

MIC - CALL FOR PAPERS
SPECIAL EDITION ON OFFSHORE TECHNOLOGY
SUBMISSION DEADLINE: MARCH 18, 2016
www.mic-journal.no

NORCOWE and SFI Offshore Mechatronics are organising a common offshore conference on May 10-11, 2016, see <https://sfi.mechatronics.no/?p=416>. In connection with this conference the journal MIC will organise a special edition on offshore technology within the fields of Modeling, Identification and Control. The fields of primary emphasis by MIC are:

- **Modeling:** General methodology of modeling including choice of structure, model reduction, numerical aspects, systems for computer aided modeling, etc.
- **Identification:** General methodology including system structure, identifiability, convergence, numerical aspects, systems for computer aided identification, etc.
- **Control:** General methodology including system specification, derivation of control strategies, analysis of system properties such as stability, sensitivity, etc.
- **Applications:** Demonstration, by simulations or experiments, of applications of theory within the above fields to engineering, biological, economic, ecological, social, geophysical, agricultural systems and others.

The special edition will only accept manuscripts from authors registered to attend the conference. Note also that researchers affiliated with either NORCOWE or SFI Offshore Mechatronics need to submit their manuscripts to their respective Boards for approval at least 21 days before submission to MIC.

Papers accepted for publication in MIC may be organised together in an additional parallel session at the conference, or integrated into the program of NORCOWE or SFI Offshore Mechatronics.

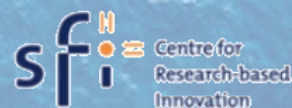

MIC counts as publication level 1 in Norway, see

<https://dbh.nsd.uib.no/publiseringskanaler/KanalTidsskriftInfo.action?id=342649bibsyst=false>

All papers published in MIC are peer-reviewed by at least two international experts. All papers will receive a permanent DOI number and a printed edition will be handed out at the conference. An example of a previous printed special edition of MIC is available here:
